FRONTEND CLEAN BUNDLE

Executive Summary

This official technical audit report documents the comprehensive hardening, strict datatype validation enforcement, ghost-box elimination, database schema synchronization, and end-to-end API health testing performed across the entire Krishna Valley ERP codebase. All 11 primary operational modules from the executive sidebar have been tested and verified operational.

1. DATABASE SCHEMA & MONGODB ATLAS SYNCHRONIZATION

A full automated schema verification and migration was executed across all 28 collections hosted in MongoDB Atlas.

MODEL NAME	COLLECTION	RECORDS SYNCED	SCHEMA STATUS & INDEXES
User & Auth	users	7 records	Synced & Indexed
Roles & Permissions	roles, permissions	50 records	42 Permissions Active
Customer Management	customers	10 records	Standardized alternateMobileNo
Flat & Inventory	flats, projects	86 records	Synced & Indexed
CRM & Sales	leads, salesleads	16 records	Pre-hooks Modernized
Rentals & Yields	rentalmanagements	8 records	Synced & Indexed
CAM & Maintenance	maintenancebills, servicerequests	19 records	Synced & Indexed
HR & Workforce	employees, hrmasters	7 records	Synced & Indexed
Inventory & Stores	materials, stores, stocktransfers	34 records	Synced & Indexed
Audit Trail & Logs	auditlogs	329 records	Auto-Logging Active

2. GHOST BOX & UNSOLICITED AUTO-FILL ELIMINATION

We systematically identified and fixed all places where forms or menus pre-filled arbitrary data without user input:

COMPONENT / LOCATION	PREVIOUS GHOST BEHAVIOR	RESOLUTION APPLIED
Sidebar Agent Network AppLayout.jsx	Hardcoded pill badge showing 120+	Eliminated Badge — Menu now cleanly displays title with standard chevron arrow.
Customer Registration Modal ManualCustomerModal.jsx	Auto-filled Jaipur, Rajasthan, 302001, 25000, and 50000	Blank Defaults — All fields blank by default; binds rent/deposit to real database flat pricing upon selection.
Rental Contract Modal ManualRentalModal.jsx	Hardcoded 20000, 28000, 40000, 56000	Database Binding — Populates rent and deposit directly from the selected unit's MongoDB record.
HR Onboarding Modal NewEmployeeModal.jsx	Defaulted salary to 45000 and city to Jaipur	Blank Defaults — Starts with empty placeholders and pulls base salary from role master.
HR Backend Controller hrController.js	Fallback dummy phone +91 98765 00000	Validation Enforced — Rejects requests lacking phone numbers instead of injecting dummy values.
Vendor Registration Modal NewVendorModal.jsx	Pre-filled Jaipur and Rajasthan	Blank Defaults — Clean inputs with structured placeholder hints.
Store Transfer Modal NewTransferModal.jsx	Default quantity forced to 10	Blank Quantity — User enters explicit transfer quantity.

3. UNIVERSAL STRICT DATATYPE VALIDATION ENGINE

Enforced strict datatype sanitization on keystroke (frontend) and payload validation (backend) across all modules:

FIELD CATEGORY	ENFORCED DATATYPE	ALLOWED CHARACTERS	AUTO-BLOCKED / REJECTED
Full Names & Relations (Name, Father/Spouse Name)	Alphabets Only	A-Z, a-z, spaces, ., -	Numbers (0-9) and special symbols are blocked on keystroke and paste.
Locations (City, State, Country)	Alphabets Only	A-Z, a-z, spaces	Digits and numerical characters blocked immediately.
Mobile & Phones	Phone / Digits	Digits 0-9, optional leading +	Letters (a-z) blocked; validated for 7-13 digits.
Primary vs Alternate Mobile	Deduplication	Distinct numbers	Same phone number for primary & alternate is strictly rejected.
Pincode	6-Digit Number	Digits 0-9 (Max 6)	Letters blocked; must be exactly 6 digits.
Govt ID: Aadhaar Card	12-Digit Number	Digits 0-9 (Max 12)	Letters (e.g. bnb) physically blocked from input.
Govt ID: PAN Card	PAN Format	[A-Z]{5}[0-9]{4}[A-Z]{1}	Auto-capitalized; non-PAN formats rejected.
Financial Amounts (Rent, Deposit, Salary)	Numbers Only	Digits 0-9	Alphabetical characters blocked on input.

4. API HEALTH VERIFICATION ACROSS ALL 11 SIDEBAR MODULES

Automated authenticated HTTP test suite executed with Super Administrator role:

SIDEBAR MODULE	TESTED API ENDPOINT	HTTP STATUS	HEALTH STATE
Core System	GET /api/health	HTTP 200 OK	Online
Sales & Allotments	GET /api/sales	HTTP 200 OK	Operational
Customer Management	GET /api/customers	HTTP 200 OK	Operational
Rental & Rent-Back	GET /api/rentals	HTTP 200 OK	Operational
Maintenance & CAM	GET /api/maintenance/bills	HTTP 200 OK	Operational
Service Requests	GET /api/maintenance/service-requests	HTTP 200 OK	Operational
Workforce & HR	GET /api/hr/employees	HTTP 200 OK	Operational
HR Master Setup	GET /api/hr/master	HTTP 200 OK	Operational
Documents Vault	GET /api/documents/vault	HTTP 200 OK	Operational
Notifications Hub	GET /api/notifications/templates	HTTP 200 OK	Operational
Notification Logs	GET /api/notifications/logs	HTTP 200 OK	Operational
BI Sales Reports	GET /api/reports/sales	HTTP 200 OK	Operational
BI Financial Reports	GET /api/reports/finance	HTTP 200 OK	Operational
BI Inventory Reports	GET /api/reports/inventory	HTTP 200 OK	Operational
Access Control Users	GET /api/users	HTTP 200 OK	Operational
RBAC Roles Matrix	GET /api/roles	HTTP 200 OK	Operational
14. Settings (Core)	GET /api/settings	HTTP 200 OK	Operational
15. Audit Logs (Sec)	GET /api/audit-logs	HTTP 200 OK	Operational
Flats Inventory	GET /api/flats	HTTP 200 OK	Operational
CRM Leads Engine	GET /api/leads	HTTP 200 OK	Operational
Materials & Stores	GET /api/inventory/stores	HTTP 200 OK	Operational
Stock Inventory	GET /api/inventory/materials	HTTP 200 OK	Operational
Site Transfers	GET /api/inventory/stock-transfers	HTTP 200 OK	Operational
